Date _____

Notes

- No contractor's signs may be posted. No burning of trees, slash, construction material, trash or any other material is allowed. Pets must be restrained from leaving the premises at all times, both during and after construction.
- Due to danger of Ips Beetle infestation, trees should be cut during the "no fly" season, typically November through February, or immediately removed from the site.
- Sites must be maintained during construction so that minimal mud, rock and other debris is tracked onto the public road. Builders will be responsible for maintaining the adjacent public road in a clean condition.
